2002-2003
General English Course, Advanced level
Oxford and Cherwell Collage, Oxford, U.K

1999-2003
Architecture Bachelor Degree
Kyoto University, Japan

About My Experience: After I graduated from Kyoto University in Japan, I moved to the Netherlands to study urbanism to develop my architectural design. The experience of Urbanism gave me more deep understanding of the cities and lives of people and I believe it is becoming a strong base knowledge for Architectural design.

During my master degree, I did some works of graphic and web design, and the experience helps me a lot for making clear presentation (made of Clear message and clear structure)

After graduation from TU Delft, I worked for BIG (Bjarke Ingels Group) as a Project Leader and moved to Madrid to work for Ecosistema Urbano in which I helped designing Madrid Pavilion in Shanghai Expo 2010.
